

Dear FCC, I think that RM-10870 is a great proposal and was well thought out it is very much like ARRL's proposal RM-10867 which is also an fantastic proposal, but I prefer ARRL's proposal because I think we should keep the novice name for a entry class level I fully support both RM-10867 and RM-10870, because all digital communication modes are more proficiant than morse code for emergency communication, we need to move with the flow of technology and historicaly remember the older technology as the stepping stones that have gotten us this far in the amateur radio community and remember that the primary purposous of amateur is emergency communication. The word amateur in amateur radio means the love of radio.
